

It was a fantabulous experience for all the winners of the contests organised by Petroleum Conventions and Research Association (Ministry of Petroleum - Government of India), throughout the nation, to visit the wonderful country of Singapore on a study tour.

The super excited 14 students, along with 3 govt. officials, flew off Delhi Airport with suppressed excitement and stayed highly expectant all night through.

We visited Nexus International school, New Water plant, Singapore Science Centre, Aquarium, Night Safari to name a few of the enriching events of the trip, not forgetting to mention the really fun filled experience at the Universal Studios, Cruise ride, and on Sentosa Island.

We were in really good hands throughout the trip, credit to Siddharth Sir, Himani ma'am, Nodhu ma'am, and our two wonderful tour guides - Miss Janki and Mr. Peter, who built a family like atmosphere in Singapore, miles away from our homes!

This trip gifted me with many happy memories that I will cherish life long, and I thank PERTA for that!

I am also grateful to my parents and my school for supporting me throughout this journey.
